PROFESSIONAL SUMMARY

Software developer with hands-on experience building web applications using JavaScript, TypeScript, React, Node.js, Express, MongoDB, and PostgreSQL. Developed projects involving authentication, API integration, interactive interfaces, and deployment. Columbia Engineering coding boot camp graduate with a biomedical sciences degree and a professional background in clinical documentation, quality control, and logistics. Seeking entry-level or junior software development opportunities.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL (Structured Query Language)

Frontend: React, JSX, Tailwind CSS, Bootstrap, Vite

Backend & Databases: Node.js, Express.js, MongoDB, Mongoose, PostgreSQL, MySQL, Sequelize

APIs & Security: REST APIs (Application Programming Interfaces), GraphQL, Apollo Server, JWT (JSON Web Token), bcrypt

Testing & Tools: Jest, Supertest, Git, GitHub, GitHub Actions, Postman, Visual Studio Code

Deployment: AWS (Amazon Web Services) Amplify, Render, Vercel, GitHub Pages

PROJECTS

Kanban Board | React, TypeScript, authentication

- Implemented backend authentication functionality and integrated login-related API (Application Programming Interface) requests for a Kanban-style task management application.
- Used typed interfaces and React components to connect application behavior with user authentication.

Book Search Engine | React, Node.js, MongoDB, GraphQL

- Developed a book-search application using MongoDB and GraphQL-based data operations.
- Worked with user account and saved-book functionality as part of a full-stack application.

Grid-Venture | React, JavaScript, Tailwind CSS

- Built an interactive tile-based adventure with player movement, obstacle puzzles, item collection, and non-player character dialogue.
- Implemented state-driven terrain rendering, fog-of-war visibility, and a contextual heads-up display.

Additional work: Wordle Clone (React; live: https://main.d22ryjodg59ixx.amplifyapp.com) and Jumper (JavaScript; live: https://main.d2udk01zvq4b82.amplifyapp.com).

PROFESSIONAL EXPERIENCE

ScribeAmerica | Medical Scribe | Sep 2019–Present | Oakland, ME | Remote

- Documented 25+ patient visits per day in electronic health record (EHR) systems while maintaining accuracy and confidentiality.
- Supported clinical workflows and documented information for a practice serving 1,000+ active patients.

TQL | Logistics Account Executive | Feb 2018–Sep 2018 | Daytona Beach, FL

- Coordinated 10–15 freight assignments and scheduled more than 25 deliveries daily; negotiated with clients and carriers.

CSL Plasma | Phlebotomist / DST / Quality Specialist | Jan 2017–Sep 2017 | Dayton, OH

- Monitored donor safety across 20 apheresis machines and followed quality-control protocols.

EDUCATION

Columbia Engineering Coding Boot Camp | Full Stack Web Development Certificate | Apr 2025

Keiser University | Bachelor of Science in Biomedical Sciences, Cum Laude | Aug 2016
